# Evolutionary Diversity Optimization for Parallel Machine Scheduling

#### Experimental Results

Dominic Wittner $^{1[0009-0008-1290-9541]}$  and Jakob Bossek $^{2[0000-0002-4121-4668]}$ 

<sup>1</sup>RWTH Aachen, Aachen, Germany dominic.wittner@rwth-aachen.de <sup>2</sup>Paderborn University, Paderborn, Germany jakob.bossek@uni-paderborn.de

The following document contains a full presentation of the experimental results obtained from the experiments conducted for the paper "Evolutionary Diversity Optimization for Parallel Machine Scheduling" by Dominic Wittner and Jakob Bossek. Each cell corresponds to the average value of an attribute of 30 runs of the in the paper presented parameter configurations by the label of columns and rows. The maximum value of each row is marked with light gray (and gray in case of multiple attributes).

#### Contents

1	Results in Terms of Diversity	2
2	Results in Terms of Running Time	5
3	Results in Terms of Fitness	8
4	Results in Terms of Robustness	10
